To Whom It May Concern,

On behalf of the Geyer Road Baptist Church, Kirkwood, Missouri, I would like to offer this letter of recommendation for Wachter, Inc., Construction Services. Wachter built an addition for our church and we were well pleased with the quality of the finished product, and for the service they provided.

Our education wing is approximately 7000 square feet. It is primarily a two story building, with a partial basement to facilitate an elevator. The new addition attaches to our existing building at all three levels, and Wachter was able to make it look very natural. The exterior of our buildings also blends nicely, greatly enhancing the attractiveness of our facility.

Wachter gave us many reasons to be pleased with their service. First of all, they did their work with integrity. No short cuts were taken; construction was performed properly in every instance we could ascertain. We were especially impressed with the coordination of the various subcontractors on the job site. The entire job was completed very efficiently, and within what we thought was a rather optimistic time schedule. Wachter's job site superintendent was very friendly, responsive to our requests, and sensitive to our church's ongoing needs during the process of construction. When we did have a bit of a problem with the city of Kirkwood regarding the regulations for a new fire hydrant, Wachter truly went the second mile for us to make sure it got done properly, even though Wachter was not at fault at all for the snafu.

Without hesitation, we endorse the work of Wachter, Inc. If you should have any questions, or if you would like to tour our facility, we would welcome your call.

Sincerely,

Ed Plants, Pastor
Geyer Road Baptist Church
