Re: New Multi-purpose building for New Life Center, Bridgeton, Missouri

We have recently completed the construction of an 18,000 square foot Multi-purpose building addition to our church facilities. After investigating and receiving information from several construction companies, the church chose Wachter Construction as our contractor. Mark Camp, representative for Wachter Construction, worked many hours in the planning stage of our project with our design team to develop a facility that would best suit our needs.

We are pleased to report that project was completed on schedule and under budget in December of 2000. Wachter Construction's personnel, both in their office and on the job site, worked in harmony with our design team and the sub-contractors as well as with New Life Center staff to complete the job to our satisfaction.

Our master plan for developing our facilities includes the construction of Phase II and III in the future. At the appropriate time we will certainly consider Wachter Construction to work on these phases as well.

Sincerely,

G.A. Tracy
